Supplement of

CH$_4$ and N$_2$O dynamics in the boreal forest–mire ecotone

Supplement Figure 3. The momentary forest floor gas fluxes (µg m$^{-2}$ h$^{-1}$) of a) CH$_4$ and b) N$_2$O in forest/mire types (uplands CT, VT, MT, OMT, transitions OMT+, KgK, KR, and mires VSR1, VSR2) as measured during the years with exceptional moisture (wet, typical, and dry). The top–down arrangement of sites mimics the locations on the slope (see Fig. 1).
