1 Time-Series of Evapotranspiration During Dry-Down Events

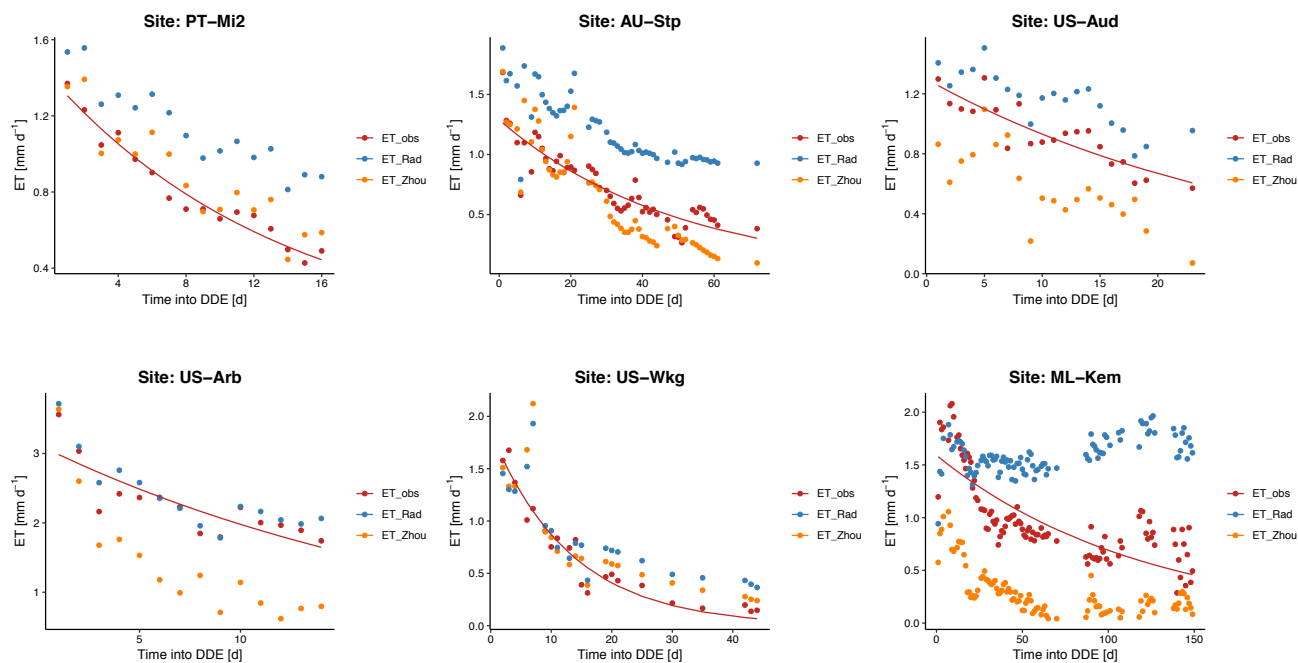

Figure 1. Observed evapotranspiration (ET) compared to predicted ET from the Zhou and Rad models for six different dry-down events and sites. The lines denote an exponential fit to the observed ET.

2 List of Sites and Estimated Parameters

3 List of Detected Dry-Down Events

Table 1. List of site properties and estimated parameters.

	Site	Vegetation type	Climate type	i	r	q	k	WAI _{amplitude}
